Assistance in Treating Head Lice

Parents/Guardians who are experiencing difficulties in addressing head lice issues in their homes should notify their Principal of the situation. Principals may assist the families in accessing the specific supports that they require, such as additional information and/or means of obtaining head lice treatments. At all times, the confidentiality, dignity and best interest of the student and family will be respected.

School Procedures for Head Lice Issues

Each school will follow the general head lice guidelines outlined in this pamphlet and tailor their school's specific head lice procedures to meet the needs of their school communities. School-specific information may be obtained from the school office, via the school website, or through other information updates provided by the school.

Introduction

The Strait Regional Centre for Education acknowledges that head lice are a common condition that can affect anyone and may appear in school communities at any time. The handling of head lice issues in school communities is a shared responsibility between the school, parents/guardians and Public Health departments. Therefore, the Strait Regional Centre for Education's guidelines for addressing head lice issues in school communities conform to Public Health recommendations.

With all partners working together collaboratively, head lice issues may be addressed in a discreet and effective manner that:

- focuses on the best interest of students;
- respects the dignity and confidentiality of students and families dealing with head lice issues; and
- minimizes the time that students are absent from school due to head lice issues.

Parent/Guardian Responsibilities

- Check their child for head lice on a regular basis (e.g. weekly; after a sleepover; every day during head lice outbreaks at school);
- Notify the school administration if their child has head lice;
- Treat their child's head lice as necessary; and
- Keep school administration informed about head lice issues as they arise.

School Staff Responsibilities

- Notify school administration of any suspected or confirmed cases of head lice observed at school.

Principal's Responsibilities

- Notify the parent(s)/guardian(s) when there is the suspicion that the student has head lice;
- Suggest to parent(s)/guardian(s) that other members of their household be checked for head lice;
- Arrange for students who are suspected of having **live** head lice to be sent home for treatment by the parent(s)/guardian(s);
- Provide parents/guardians with access to information and assistance in addressing head lice issues, such as brochures and pamphlets from Public Health partners;
- Permit a student with head lice to return to school after the first treatment in accordance with Public Health recommendations;
- Following treatment, permit students who are suspected of having nits to remain at school;
- Send a notice to all parent(s)/guardian(s) when there is a confirmed case of head lice in your school;
- Work with all partners to address head lice issues in a collaborative and sensitive manner that respects the dignity, confidentiality and best interests of students and their families.
